

ECO-SOL MAX

ECO-SOL MAX INK. IT'S TOUGHER.

WITH MORE VIVID COLOR, GREATER SCRATCH RESISTANCE, NO ODOR, AND LOWER PRICING ECO-SOL MAX INK ADDS NEW PUNCH TO EVERY ROLAND ECO-SOLVENT INKJET.

Looking for an unbeatable one-two combination? Eco-SOL MAX INK boosts the performance of the entire lineup of Roland eco-solvent printers and printer/cutters...from the nimble 30" VersaCAMM to the heavyweight 104" SOLJET. Revolutionary MAX is tougher than ever, standing up to handling and fabricating with rugged scratch resistance and quicker drying time. The vivid colors and rich ink density will pop your eyes. And you won't get knocked out by noxious fumes, because MAX is virtually odorless, and is free of the harmful compounds typically found with hot solvent inks. Best of all, the price of ECO-SOL MAX is 20% LOWER than our previous ink. And its support for a broad range of affordable, profiled coated and uncoated media drops your daily production costs even lower. In the battle of inkjets, it's really no contest.

ECO-SOL MAX. Maximum performance and value.

ROCK YOUR ROLAND

INTRODUCING ROLAND ECO-SOL MAX INK

REPLACES ECO-SOL INK IN ROLAND ECO-SOLVENT INKJETS

If you thought Roland inkjets were the baddest boys on the block before...take a look at us now. Eco-SOL MAX has been formulated to boost the performance of all Roland eco-solvent inkjet printers and integrated printer/cutters, including our popular VersaCAMM and SOLJET models. Now, these already powerful performers really rock.

FASTER DRYING TIME AND MORE AGGRESSIVE BONDING

Eco-SOL MAX produces quick drying graphics that bond more aggressively and can be handled right off the printer on a wide variety of substrates. This advantage increases productivity and allows MAX ink to perform with take-up roller systems for long, unattended production runs, even in high-speed mode.

RUGGED SCRATCH RESISTANCE FOR EASY HANDLING AND FABRICATING

Formulated for durability, Eco-SOL MAX features improved scratch resistance, critical to the production of outdoor banners and other graphics that involve complex finishing techniques. For outdoor banners, MAX maintains image quality throughout the printing and finishing processes including welding, sewing, and the attachment of grommets.

EXCEPTIONAL IMAGE QUALITY

With a wider color gamut, Eco-SOL MAX delivers exceptionally bright reds, greens and blues. Higher ink density ensures rich, solid colors. These graphics are not just beautiful...they're also durable up to three years outdoors without lamination.

VIRTUALLY ODORLESS

Unlike hot solvent ink, Eco-SOL MAX is virtually odorless and safe to use, ensuring a comfortable working environment. No special ventilation or environmental equipment is required. In addition, Roland inkjet printers and printer/cutters automatically clean their print heads and require no major user maintenance.

PERFORMS WITH ROLAND RIP SOFTWARE

Eco-SOL MAX is designed for performance with existing Roland RIP software, including VersaWorks, COLORIP and ColorChoice, requiring a simple firmware update and new profiles. Compatible Roland media profiles are available for all platforms.

NEW LOWER PRICING

Ready for the knockout punch? Even with all of its added performance, the price of MAX is actually 20% LOWER than our previous ink. And its support for a broad range of affordable, profiled coated and uncoated media drops your daily production costs even lower.

CONVERTING TO ECO-SOL MAX

Rocking your Roland by converting to Eco-SOL MAX is completed in a few easy steps. All you need is the MAX compatible firmware and a set of Eco-SOL MAX inks. After an easy firmware upload the printer will guide you through the simple ink switch process.
